BRAND'S SECRET RECIPE

Nirlep Appliances Pvt. Ltd., established in 1968, marked the launch of Non-stick technology in India. Today, with 50 years of experience and with millions of satisfied customers, it is the most preferred brand that is synonymous with Non-stick cookware.

Nirlep's strength lies in deep understanding of diverse cooking habits across all the Indian markets coupled with quality and innovation. Nirlep has many distinctions to its credit when it comes to being the technological specialist in Non-stick cookware: It is the first producer of Non-stick cookware in India. It has given consultancy and done turnkey projects in Middle East, Africa and Sri Lanka for setting up advanced Non-stick cookware production units. It has developed state-of-the-art Non-stick coatings and speciality heat resistant paints with in-house expertise. It exports professional Non-stick cookware used in commercial kitchens to Europe.

Nirlep represents modern lifestyle and identifies future needs of a kitchen. It has witnessed notable developments over the past one year. It operates two automatic manufacturing plants, out of which one is a fully automatic ultra-modern unit. It is the only company to produce 2-way Non-stick induction compatible cookware in India with easy to clean coloured Non-stick exterior.

Nirlep - A brand that creates to amaze.

INSEPARABLE INGREDIENT OF INDIAN KITCHENS **SINCE 1968**

During 50 years of its existence, Nirlep Group has offered quality innovative products to domestic as well as global markets.

In 1968, Nirlep launched the first Non-stick pan and revolutionised the Indian cooking. And since then, Nirlep has never looked back. With the international certification of ISO 9001:2008, domestic ISI, and many other multinational customer certifications like IWay, Nirlep promises quality that has been endorsed by millions of customers over the past 5 decades.

With extensive presence across India in traditional & modern retail, Nirlep has been extending its reach to consumers with newer and innovatively designed products. Some of its power brands are: Select+, Ebony, Ebony+, Sakhi and Snackmaker.

Nirlep has been consistently evolving as a brand that anticipates consumers' future needs and creates products that add unprecedented value to 'A brand that creates to amaze.'

MASTER CHEF OF **COOKWARE INDUSTRY**

BEST QUALITY. WORLD CLASS PRODUCTS.

Quality is what quality does. 'Nirlep' has been synonymous to this aspect since 1968, the year when Non-stick pans were incepted in India. To achieve quality of the highest standards, Nirlep employs the best technology, world-class processes and stringent quality tests.

Nirlep, through its experience and expertise employs the best of materials, process and technology to achieve high quality coating. Automatic washing, blasting and coating machines with state-of-the-art controls ensure coating to stick to the surface for a lifetime.

CONSISTENT COATING THICKNESS

At Nirlep we use advanced technology to ensure flawless and uniform coating thickness across the pan and a perfect bake in environment friendly ovens. This helps in extending life of the coating surface over years of usage.

Automatic machine for accuracy of coating

Automated spray coating machine with PLC controls to achieve uniform thickness through precise spray quality

Precisely set temperature profile to ensure coating adhesion and 100% non-stick performance

Energy efficiency assured, automatic base grooving for even heat distribution

Induction Plate bonding machine of 2500 tons

BOTTOM SURFACE OF COOKWARE

At Nirlep, the bottom surface of the pan is as important as the top surface. World class automatic machines are employed to attain precise bottom finishing and better embedded Induction Plate ensures lifelong performance. This enables in even heating and smoothness so that fingers do not get hurt while cleaning.

STRONG & LONG LASTING HANDLES

Automatic machines are used to secure the handle to the pan so that the handles remain sturdy and strong. Also Nirlep uses special technology to achieve rivet-free interior of the pans. Added advantage is no food build-up on the inside surface of the pan and hence hygienic and maintenance free.

Super strong, easy to grip and heaviest Crest Handles

Fully automatic stud welding machine for rivet-free interiors

MASTER CHEF OF **COOKWARE INDUSTRY**

Automatic process to give uniform exterior finish

INNOVATIVE NON-STICK EXTERIOR FINISH & STYLISH LOOK

The Nirlep range of cookware comes with India's first 2-Way Non-stick & easy to clean Non-stick exterior finish. Nirlep also introduced India's first coloured 2-Way Non-stick cookware range. Nirlep offers attractive colour options and Impeccable exterior finish. The cookware not only looks stylish but brightens the way the kitchen looks.

ENDURANCE TEST

Nirlep has introduced toughest test in the industry to ensure best quality cookware. Our pans undergo stringent quality tests. One pan from each batch of manufacture is subjected to the test. Cooking at a rapid pace and at various threshold levels of heating is done to simulate actual Indian cooking conditions. Various food items like chapattis, omelettes etc. are prepared on it. Only after completion of one year equivalent of cooking cycles for an average Indian family is the batch certified for use.

Endurance testing

ATTENTION TO DETAILS

At Nirlep, we pay special attention towards Non-Stick Coating application and its consistency to ensure long life. We follow automated process to ensure perfect surface for coating application with the help of Digitally controlled Baking system, automatic washing machine for De-greasing and advanced Ra Meter for precise blasting process.

4 zone, convection heated digitally controlled baking system of coating

Automatic washing machine for 100% de-greasing

Blasting process control with Ra Meter to ensure flawless adhesion of coating and long life

NIRLEP COMMITMENT TO ENVIRONMENT

Nirlep conforms to the latest waste disposal law which is certified by a Government Authorized Agency. All our latest technologies combine proper waste collection and disposal mechanism for minimum pollution. For example, the coating booths are fitted with over-spray filters which absorb all the excess coating spray. This is then disposed in an eco-friendly manner.
